

Odds vs Probability

What is the difference between odds and probability? Odds are the ratio of the number of favorable outcomes to the number of unfavorable outcomes. Probability is the ratio of the number of favorable outcomes to the total number of possible outcomes.

For example, if the probability of an event occurring is 10% (0.10), the odds are 1 to 9 (1/9). Qual a diferença entre chances e probabilidade? - FAQ 1466
