

## 0 0 bet365

[The linear range can be measured simply by making a plot of analyte concentration versus fluorescence, using evenly-spaced analyte concentrations, and seeing at what concentration the data deviate from a straight line that is tangent to the low end of the concentration range.](#)

[Determining the linear range is relatively easy, and can be achieved by taking a sample and performing a serial dilution.](#) If the ranges overlap then determining the amount of sample to load is also similarly easy.
