## 00 bet365

\& It;p\& gt;To fully exploit the constrained width, avoid loading the neighbouring structures and straddle shared utilities running under the site, the \& \#127774; house was constructed using a lightw eight steel frame on a piled slab. The steel work was prefabricated as a series of \& \#127774; portal frames that were craned down the alley and site-welded together. Given that every inch in such a narrow space \& \#127774; was valuable we chose to fully weld the connections and express the frame internally, even utilising the depth of the \& \#127774; steels to maxi mise the space.\& $\mathrm{It} ; / \mathrm{p} \& \mathrm{gt}$;
\& It;p\& gt;A longside the painted steel a simple pal ette of spruce plywood, douglas fir joists, terrazzo and cork \& \#127774; flooring enriches the interior. Extern ally the timber framed walls are clad in handmade pewter glazed brick slips with a patina \& \#127774; that reflects the changing light of the sky. B oth the simpl y landscaped and planted rear courtyard and the garden in \& \#127774; front of th e house enhance the feeling of space in this small dwelling.\& It;/p\& gt; \& It;p\& gt;This self-build project had a long gestation, fitted \& \#127774; in arou nd professional and family life. The design and construction were developed as t ime and money allowed so whilst planning \& \#127774; consent was given in J anuary 2014 and the ground works commenced in the spring of 2024, the building was not \& \#127774; completed until A ugust 2024. We worked closely with friend and joine r M ichael Tye to lead a small team of local \& \#127774; subcontractors and employ ed specialist fabricators for certain key packages as well as undertaking a fair amount of the work ourselves. \& It;/p\& gt;
\& lt;p\& gt;The \& \#127774; result is a unique and highly crafted home that is a tes tament to the commitment, effort and support of many \& \#127774; people. By repla cing a narrow disused alley with this comfortable small home we hope to have enh anced the streetscape we \& \#127774; inhabit. A s the building completes the terra ce, so does the front garden - with the simple bin store, planting, level \& \#1277 74; access and bike parking we aimed to keep it open and reinforce the pavement line without making a hard boundary. \& \#127774; The development highlights the viability, both economically and spatially of small brownfield sites to provide high quality sustainable development at \& \#127774; a time of housing shortage. W e see it as a model for other seemingly undevelopable urban gap sites where the \& \#127774; value added is through the quality of the architecture rather than ov er-development.\&|t;/p\& gt;
