<p>mau</p>

<p></p><p>The TL;DR version of this review is: surprising ligh

t, extremely pocketable, does the job, not my dream charger but at 7 , £ the pric

e it s well worth it.</p>

<p>We ve covered a product of Lepow s before, the Moonstone. Like the Moon

stone, the Poki comes 7 , £ with a cloth carrying case that you can stash a USB c

able in (it appears to come with a 6 ‡ 7 , £ USB-> MicroUSB,) or chuck your ID

and credit card in and use it as a wallet while you re out. It s 7 , £ actually t

he first thing that stood out when I was looking at the device. The Moonstone is

still going strong 7 , £ with a friend of mine a year later.</p>

<p>The battery delivers a 90% conversion efficiency rating according to sp

ecs on the 7 , £ manufacturer s website. Most batteries go from the high 70 s to

mid 80 s. You want to see a higher number as 7 , £ this is how much power gets de

livered with the rest being lost in conversion.</p>

<p>The Poki can charge and recharge at 7 , £ 2.1amps. This means you re not

stuck for 20+ hours charging a 10,000mAh battery at 500mA. At 2.1 amp you shoul

d 7 , £ be able to charge this in under five hours and with 90% conversion effici

ency you should have around 9000mAh of 7 , £ actual juice to spare. That should b

e enough for at least three complete charges from dead to full for any 7 , £ smar

tphone on the market today.</p>
